

Dormak R12 H

DOLS01 - Dormak

POWERED by
HONDA

The Dormak RL12H is a heavy-duty log splitter for the semi-professional user. Featuring a premium Honda engine and a splitting force of 12 tonne, the RL12H makes light work of large volumes of wood at lengths of up to 700mm. Featuring a twin speed motor and 3 working positions, the RL12 is a premium semi-commercial workhorse that's built to last, yet is easy to use.

Easily Maneuverable

The Dormak RL12 is a heavy duty machine, yet thanks to its transport wheels, can be moved around with ease.

Work your way

The Dormak RL log splitter features a 3 position working system, allowing users to split vertically, horizontally or in between. The working length of the splitting wedge can also be adjusted through 6 position

Honda Power

The Dormak RL12H is powered by a premium quality Honda GX160 engine. Featuring 163cc and a huge 3.4kW power output, there is plenty of power for tough task, and the reliability you would expect from a Honda engine.
